## get client nickname on module

Posted by badben - 2008/09/14 21:27

---

Hi,

On the method "doNode" how to get the nickname client :

```
def doNode(self,nodeName,node,client):
    client.name ?
    client.nickname ?
```

Thanks ;)

you almost had it :

client.nickName with a big N

I was writing that just 1sec ago ;)

I found it by reading the source code in the linux package.

Thanks.
